Game Design Document

Working title *A temporary, catchy name for the game.*			**The Lost Tetronimoes**	
Developer's name(s) *Include roles if you plan to work as a team*			**Tommy Jones**	
Genre(s) *State the primary genre and any secondary genres. (or game reference)*			**Puzzle, RPG**	
Concept statement *A one or two-sentence pitch describing what the game is, its main features, and/or why it is fun.*			**The game is a small dungeon crawler that requires users to navigate various levels solving puzzles along the way in order to progress.**	
Technology	**Engine** *The software used to build the game*	*Godot*	**Platform** *The OS you plan to release your game*	*Web*
	Control *The primary input method*	*Mouse, Keyboard*		
Aesthetics	**Feel/Mood** *Describe the overall emotional atmosphere of the game.*		*Eerie, Puzzling*	
	Visual Style *Describe the art direction, camera angle, color palette, and visual fidelity.*		*2D Pixel Art Dungeon Crawler*	
	Audio Style *Describe the music genre, and overall audio direction.*		Eerie Dungeon Audo, Possibly 8-bit	
Story	**Game Characters and Objects** *List down the characters and objects in the game and their role.*		**The player - Navigates the map interacting with pillars** Pillars - Acts as moveable objects to weigh buttons down Buttons and levers - Act as a means to progress through various rooms and the levels Tetronimoes - Collectible blocks that the user can pick in order to progress	
	Objective and Progression *Explain the long-term player goals and how the game introduces new challenges over time.*		**The long term goals for the player is to make it outside of the dungeon by solving puzzles. The game introduces new challenges by introducing new puzzles and aspects to the puzzles over the course of the levels.**	
	World Building *Briefly describe the setting, key lore, and dynamics between characters and the world.*		**The setting is going to be a 2D dungeon with a darker/eerie theme. The lore is going to be that the character woke up in the maze and needs to escape and get into the outside world.**	
Mechanics	**Actions** *List the actions that the players can do.*		**The player can walk all four cardinal directions and also move some objects, step on buttons, and interact with levers.**	
	Rules *Outline the fundamental constraints and win/lose conditions of the game.*		**The constraints are the user must stay within the bounds of the map, with the only win condition of the game being the ending when they user makes it out the mase.**	
	Core loops *Describe the minute-to-minute gameplay cycle, how does the player interact with the game objects or other characters*		*The player interacts with various pillars around the map and is able to push them around. The user can also interact with buttons and levers in order to open gates/put down spikes. Can also pickup tetronimoes in order to open the door into the next level*	

	Game Systems *List down specific systems like combat, inventory, crafting, or leveling.*	**User has a bit of an inventory with the Tetronimoes**

Project Focus

Before diving too deep into the implementation, list down the things you want to achieve through the making of the game. (e.g.make a new game from scratch, learn more about GD Script, make your own art or music, expand on design of mechanics)

1. Through making this game I want to learn more about the capabilities of Godot as well as explore the creation of puzzles within games. I want to learn more about the syntax and programming capabilities within Godot and GD script as well.

Task List

The list of tasks required to complete your project prototype, include priority and assignment to team members (if applicable).

Feature	Task	Priority	Assigned to
Door Puzzle	Create puzzle to use the blocks collected to unlock each door to the next level.	High	Tommy
Pillar Movement	Try to make pillars move smoothly in a grid based movement system.	Low	Tommy
Add pull feature	Add pulling to pillars so users cabt get the pillar stuck.	COMPLETE	Tommy
Background Music	Find and add fitting background music across the levels.	COMPLETE	Tommy
